

Player vs Player Statistics

Find the game history of a player vs any opponent in this view.

Select Players

1. First select the team for the player and the opponent. Select * *All Players since <year>* to show all players who ever played in the league.
2. After selecting the teams the players can be selected.
3. Players are listed in alphabetical order of firstname, lastname, nickname. If all players of the league are selected this can be a very long list.
4. If you are not logged in you will see nicknames only for players who chose to be identified with nickname only. The still appear in the sort order according to their firstname and lastname. For example, a player named *Bernard 'Eagle' Condrau* would be shown as 'Eagle' next to players who's firstname start with 'Ber...'.
